

How to read it: the bold name next to a control is what it does from the home screen. Its other jobs sit beyond it in lighter type, each led by how to reach it: HOLD, LONG, 2x = hold it, press it long, press it twice. FX+ = hold FX, then use this control. WITH OCT+ = press it together with OCT+. AGAIN = press it again on the home screen. ELSE = on every other screen. A name and a colon (ENV:) = on that page. Key names run along the keys: the upper row above the keyed (under the buttons, below the dotted rule), the lower row along the front edge.

MAKU maku-v1.0

Mapped from MAKU maku-v1.0 (5671198), 2026-10-17. The names for each job are Les's own short wording, from Les's control map of this firmware.

Every control's main job is here (SAVE: no job of its own, left blank), and 6 more; 23 more did not fit and are left off (Les knows them all). Cut on the solid lines. The dashed line is the case edge, 161.5 x 96.5 mm.
