How to read it: the bold name next to a control is what it does from the home screen. Its other jobs sit beyond it in lighter type, each led by how to reach it: HOLD, LONG, 2× = hold it, press it long, press it twice. FX+ = hold FX, then use this control. WITH OCT+ = press it together with OCT+. AGAIN = press it again on the home screen. ELSE = on every other screen. A name and a colon (ENV:) = on that page. Key names run along the keys: the upper row above the keybed, the lower row along the front edge.
